### **MATERIAL FACT**

**IDEIASNET S.A.**, a publicly held company with head offices at Rua Visconde de Pirajá n. 572, salão 401/parte, Rio de Janeiro, inscribed in the roll of corporate taxpayers (CNPJ-MF) under number 02.365.069/0001-44, hereby informs its shareholders and the market in general that its investee Padtec S.A. ("Padtec") has been chosen by Telemar Norte Leste S/A ("Oi") as its supplier, for the next three (3) years, of the following systems: (a) DWDM for long-distance network applications; and (b) DWDM for access network applications.

This contract will generate substantial growth in Padtec's revenue from Oi over the next three years.

The bid, the biggest in Brazil for a DWDM purchase until now, consolidates Padtec's position as the leading supplier of DWDM-based long-distance and access networks in Latin America.

DWDM (high density wavelength division multiplexing) is a high-end optical communications technology which permits the most efficient use of fiber-optic transmission capacity. It is the only technology available capable of handling telecom network data, voice and video traffic and can be used in long-distance (intermunicipal, interstate and international) networks or in access networks where high-density traffic clients multiply the transmission capacity through their use.

Rio de Janeiro, November 27, 2009.
